OVERVIEW

CareerLeader® is a fully integrated approach to business career self-assessment built on the premise that one's interests, motivators and skills will drive their future career success and satisfaction.

This report contains your personalized results from the CareerLeader program: Interests, Motivators, Skills, Career Match, CultureMatchTM, and Things to Be Alert For. When reviewing these six sections, we encourage you to pay special attention to your highest (and lowest) scores, as well as to any results that surprise you.

MY INTERESTS

This table shows how interested you are in each of the eight core elements of work in business and other organizations (when compared to several hundred thousand other business professionals). For example:

- A score of 88 means that your interest in this area is stronger than 88% of other business professionals.
- A score of 25 means that your interest is stronger than 25% of other business professionals (therefore 75% of them are more interested than you are).

CORE ACTIVITY	SCORE	DETAILS
Enterprise Control Personal High	49	Interested in setting business strategy and having the power to ensure that the strategy is carried out. Ultimately want general management role.
Influencing Others	40	Enjoy persuading others,whether to buy a product or service or to support a proposal. Often enjoy making presentations, but may prefer writing or one-to-one negotiations.
Application of Technology	39	Interested in learning about and using new technologies. Enjoy analyzing and designing (or redesigning) business processes such as production and operations systems.
Theory Development and Research	32	Interested in high-level abstract thinking about business issues, and the theory (as well as the practice) of business strategy. Enjoy doing in-depth research.
Coaching and Mentoring	19	Enjoy helping develop employees and others to reach their fullest potential. Often prefer work with high social values, and organizations with a collaborative culture.
Creative Production	16	Enjoy brainstorming novel ideas for products and services. Prefer early, creative stages of businesses and projects to later "maintenance" phase.
Managing People and Teams	14	Interested working with and through others on a day-to-day basis to accomplish concrete business goals. Enjoy leading teams, and prefer line management to staff roles.
Quantitative Analysis	5	Prefer solving business issues by "running the numbers." Enjoy building computer models, doing financial and market research analysis.

Personal High: This interest is significantly stronger than your other interests, regardless of its numeric value.

My Key Interests

How well your career aligns with your key interests is the best predictor of how successful and satisfied you'll be in your work.

You have a notably high interest in the following core elements of work in business and other organizations:

ENTERPRISE CONTROL

You enjoy setting the strategy and seeing it executed. You want to have ultimate decision-making authority for complete operations; to make the decisions that will determine the direction taken by a work team, a business unit, or an entire company; and to control the resources that will enable you to actualize a business vision.

In the workplace, you will likely enjoy activities such as:

- taking the lead on implementing important strategic decisions
- "owning" deals and negotiations, including securing new clients and customers
- leading project teams, departments, and even entire businesses
- having full responsibility for the profit-and-loss performance of an enterprise
- being involved in all aspects of a business enterprise (marketing, finance, sales, operations, etc.)

The "enterprise" you control can be big or small, short or long-term. You might want to control an enterprise that you believe will exist for your lifetime, or even beyond. On the other hand, you might prefer being in charge of much shorter-term "enterprises". But, regardless of the size or life span, you'll want to be in charge and setting the strategy.

With a strong interest in Enterprise Control, you may find it difficult to be patient during the early stages of your career, when you're learning and proving that you're qualified to be captain of the ship. If you feel frustrated, resist the temptation to switch to another company too early. Impatience can get in the way of your success if you let it force you off your career path too soon.

Of course, having a strong interest in Enterprise Control doesn't necessarily mean you have the skills you need to succeed in a career in which that activity is the dominant part of the work. But, people often develop skills where their interests lie. So, don't let a lack of training or prior experience with leadership activities keep you from pursuing opportunities to express this interest.

INFLUENCING OTHERS

You enjoy writing and/or talking to people -- with the specific goal of gaining their agreement on a particular topic. You enjoy work that gives you opportunities to persuade someone to buy something, to support an initiative, or to contribute resources to a project.

In the workplace, you will likely enjoy activities such as:

- persuading people through written communication rather than in person
- speaking to people individually
- · making presentations to large groups
- engaging in short-term, quick interactions
- building long-term relationships

But, regardless of these preferences, you enjoy bringing people around to your particular point of view. Clearly, a natural fit for someone with this interest would be business development and sales, or relationship management. But, it is possible to express it through virtually any business career path.

APPLICATION OF TECHNOLOGY

You enjoy taking a systematic, engineering-like approach to solving problems and understanding systems and processes -- regardless of whether you've ever studied engineering. You feel comfortable with technology and like to know how things work. And, you probably enjoy using technology both in your work and outside of it. You may want to express this interest by working in businesses that involve technology, either as a product or as an integral part of the services they provide.

However, an interest in Application of Technology cannot be equated to an interest in engineering. While most professional engineers do have an interest in Application of Technology, many people who have never studied engineering also share this interest. In the workplace, you will likely enjoy activities such as:

- understanding the information technology aspect of things (even if you don't work in IT)
- seeking ways to increase profitability by re-engineering processes
- researching how your firm's supply chain system works
- maximizing the new technologies you use personally (PDAs, laptops, software, etc.)

If you have both a strong interest in Application of Technology and strong engineering skills, companies that value prior engineering training may be a good fit. Some manufacturing and technology-oriented firms view an engineering degree as a "membership card" necessary for promotion into high-level management positions. If you don't have engineering credentials, you should avoid companies that have this kind of professional-engineer bias.

THEORY DEVELOPMENT AND RESEARCH

You enjoy solving business problems by taking a conceptual "big picture" approach. You explore abstract ideas and the "what ifs" of a business or industry, and take into consideration broad economic and social trends.

In the workplace, you will likely enjoy activities such as:

- analyzing a company's competitive position in a particular market
- considering the value proposition of a merger or acquisition
- designing a new process for product development or distribution
- developing economic theory

A singular interest in Theory Development and Research is relatively unusual among business professionals, and is usually associated with working in an individual contributor role. Many strategy consultants (those involved more in "knowledge development" than business development), investment analysts, marketing analysts, and academics have a strong interest in Theory Development and Research.

If you eventually move into a management role, you are likely to be attracted to industries in which Theory Development and Research plays a dominant role (e.g. managing investment and marketing analysts).

MY MOTIVATORS

This table shows how motivated you are by each of the 13 motivators typically found in work in business and other organizations. The higher the number, the more important it is to you.

MOTIVATOR	SCORE	DETAILS
Affiliation	12	The position offers a setting with enjoyable colleagues with whom I feel a sense of belonging.
Autonomy	11	The position offers considerable autonomy and independence.
Prestige	10	The position is with an organization that commands a great deal of prestige in its field.
Intellectual Challenge	8	The position offers consistent intellectual challenge.
Power and Influence	8	The position offers the opportunity to exercise power and influence (to be an influential decision-maker).
Managing People	7	The position offers the opportunity to manage and direct other people.
Financial Gain	6	The position provides excellent opportunity for exceptional financial reward.
Lifestyle	5	The position allows ample time to pursue other important aspects of my lifestyle (family, leisure activities, etc.)
Variety	5	The position provides a great deal of variety in the nature of the work performed.
Security	3	The position offers a great deal of security in terms of predictable salary, benefits, and future employment.
Positioning	2	The position offers experience and access to people and opportunities that will position me well for my next career move.
Recognition	1	The position is in an environment where individual accomplishments are recognized with praise from peers and superiors.
Altruism	0	The position offers the satisfaction of regularly helping others with their individual or business concerns.

My Koy Motivators

My Key Motivators

Your motivations today are likely to stay true for several years, and are important to take into account as you think about your career. That being said, pursuing a job or career that you don't really enjoy simply because you want the reward is a strategy likely to lead to dissatisfaction (and to you not being very successful as a result). It is also important to keep in mind: some motivations are unlikely to change over time, some are likely to change as you get older, and others may change with changes in life circumstances.

You are most highly motivated by the rewards you see below. A job that comes with very little of these rewards is unlikely to be satisfying for long. You may be able to suffer through it for a while, and it may be worth it to suffer a bit if it is clear that after that initial period there will be a definite change. But, if this path will continue to offer very little of these rewards for a substantial period of time, this should be a clear warning to you.

AFFILIATION

Having affiliation as a key motivator means that who you are doing something with is almost as important as what you are doing. For most people, this is more important in the negative direction than in the positive. If a position has enough people you enjoy working with (assuming it's not also stocked with people you can't stand working with), you're fine. More wonderful people would be great, but "clearing the threshold" is the key. But, if there are not enough people you enjoy by your standards, you're going to become pretty unhappy rather quickly.

AUTONOMY

People sometimes equate a high desire for autonomy with wanting to work alone. These are two entirely different elements. For example: People working in trading functions (equities, fixed-income securities, commodities, etc.) place a very high value on working with autonomy. But typically, they really enjoy working with other traders on the floor, and spending time after closing with those people. If this is one of your key motivators, what it does mean is that you will find close supervision very, very difficult to live with. Of course, there are many career paths where you are going to be watched pretty carefully until you prove yourself - which is totally understandable. You may be able to tolerate this arrangement for a while, but you should make sure it's not going to be so long that it begins to feel oppressive. Needless to say, this also holds for taking a position working for a manager who you sense might "micro-manage" his or her employees.

This is one of the motivators least likely to change in people. Your desire for security may wax and wane with personal circumstances (or the economy). You may be highly motivated by financial gain, then win the lottery and find yourself much less oriented toward making money. But, if you're very highly motivated by autonomy today, it's very unlikely that in a few years-or in many years, for that matter-you're going to become someone who wants to be told what to do at every turn.

PRESTIGE

If prestige is a strong motivator for you, it's good that you recognize it. A lot of people want prestige, but aren't willing to admit it -- even to themselves. There's a lot to be said for working for a "premium brand" name. For example, it may make future career moves significantly easier if the company is one everyone has heard of, and recognizes as a quality organization. The only caveat here is to make sure you're distinguishing between a prestigious *organization*, and a prestigious *position* or *title*. If you want to be Chief Financial Officer four years out of school, it's probably not going to be with Microsoft or Procter & Gamble.

MY SKILLS

This table reflects your level of confidence (when compared to several hundred thousand other business professionals) in each of four core basic leadership skills factors. While self-confidence is a powerful predictor of actual performance, we recommend that you also ask for feedback from other people who are able to assess your skills. Please note that there are both personal and cultural differences in how people tend to assess their abilities. If you think you tend to "undervalue" your own skill level, for whatever reason, you should take that into account when considering your results.

COMPARISON SCORE: A 90 means that your self-confidence is higher than 90% of those business professionals. A 10 means that 90% of the business professionals are more confident than you are.

INTERPERSONAL EFFECTIVENESS

Good at working with, and through, other people. Understand people and how to motivate them. A good team member, as well as team leader. Engender others' trust. A skillful negotiator.

Although all 41 skills from the Leadership Skills Profile are used to compute your score on each factor, these are the most important individual skills for this factor. This is a measure of *your* perception of *your* skill versus the perception that *other* people have of *their own* skill. While self-confidence is a powerful predictor of actual performance, we recommend that you also ask for feedback from other people who are able to assess your skills.

- YOUR SCORE: your assessment of your skill level
- COMPARISON SCORE: your assessment compared to several hundred thousand other business professionals' assessments of their own skill levels
- 360 SCORE: your raters' assessment of your skill level

SKILL	YOUR SCORE	COMPARISON SCORE	360 SCORE	DESCRIPTION
Ability to Teach	99	89 th percenti l e	-	Clear and patient when explaining things; a good teacher.
Empathy Skills	97	85 th percenti l e	-	Can see things from other people's points of view.
Ability to Compromise	94	83 rd percenti l e	-	Able to compromise when the situation calls for it.
Comfort with Differences	98	82 nd percenti l e	-	Comfortable and effective in relating to people from many different backgrounds and cultures.
Openness to Criticism	88	81 st percenti l e	-	Accepts critical feedback without getting defensive.
Teamwork	96	78 th percenti l e	-	A team player: cooperative, works well as part of a group.
Respect for Others	90	73 rd percenti l e	-	Respectful of other people's points of view, as well as their time and priorities.
Gaining Trust	90	71 st percenti l e	-	Inspires other people's trust.
Sensitivity and Tact	84	61 st percenti l e	-	Sensitive and tactful: promotes an atmosphere of good feeling and mutual consideration.
Listening Skills	82	59 th percenti l e	-	Listens to other people in a way that they feel understood.
Self-control	65	34 th percentile	-	Does not act or speak impulsively; does not easily lose composure.

COMPARISON SCORE: A 90 means that your self-confidence is higher than 90% of those business professionals. A 10 means that 90% of the business professionals are more confident than you are.

POWER AND INFLUENCE

A persuasive communicator, able to "tailor" arguments to different audiences. Skilled at building relationships, networking and motivating others. Not easily embarrassed, and willing to risk failure if necessary. Able to make difficult leadership decisions.

Although all 41 skills from the Leadership Skills Profile are used to compute your score on each factor, these are the most important individual skills for this factor. This is a measure of *your* perception of *your* skill versus the perception that *other* people have of *their own* skill. While self-confidence is a powerful predictor of actual performance, we recommend that you also ask for feedback from other people who are able to assess your skills.

- YOUR SCORE: your assessment of your skill level
- COMPARISON SCORE: your assessment compared to several hundred thousand other business professionals' assessments of *their own* skill levels
- 360 SCORE: your raters' assessment of your skill level

SKILL	YOUR SCORE	COMPARISON SCORE	360 SCORE	DESCRIPTION
Oral Communication	98	91 st percentile	-	A skillful public speaker, good at presenting ideas and plans in a persuasive manner.
Assertiveness	99	90 th percentile	-	Able to defend a point of view and to confront others appropriately when necessary.
Power-orientation	97	89 th percentile	-	Comfortable asserting authority and using power.
Conflict Tolerance	93	87 th percentile	-	Able to be effective in an environment where strong and opposing views are being expressed.
Sociability	95	87 th percentile	-	Socially venturesome and self-assured; forms new relationships easily and works to maintain them.
Projection of Confidence	95	86 th percentile	-	Projects self-confidence, even in uncertain and difficult situations.
Leadership Confidence	97	82 nd percentile	-	Comfortable taking a leadership role.
Motivational Ability	85	78 th percentile	-	Understands how to motivate different kinds of people to do their best work.
Influence	78	61 st percentile	-	Can influence and persuade other people, even without direct authority.
Political Skill	53	22 nd percentile		Knows how to get things done within the political framework of an organization.

COMPARISON SCORE: A 90 means that your self-confidence is higher than 90% of those business professionals. A 10 means that 90% of the business professionals are more confident than you are.

ANALYSIS AND STRATEGIC DECISION MAKING

Skilled at identifying the essential elements involved in a business situation, as well as analyzing them (both logically and quantitatively) to arrive at a decision. Able to be both objective and flexible in generating and evaluating ideas.

Although all 41 skills from the Leadership Skills Profile are used to compute your score on each factor, these are the most important individual skills for this factor. This is a measure of *your* perception of *your* skill versus the perception that *other* people have of *their own* skill. While self-confidence is a powerful predictor of actual performance, we recommend that you also ask for feedback from other people who are able to assess your skills.

- YOUR SCORE: your assessment of your skill level
- COMPARISON SCORE: your assessment compared to several hundred thousand other business professionals' assessments of *their own* skill levels
- 360 SCORE: your raters' assessment of your skill level

SKILL	YOUR SCORE	COMPARISON SCORE	360 SCORE	DESCRIPTION
Comfort with Risk	100	90 th percenti l e	-	Takes risks when appropriate, isn't afraid to innovate and experiment.
Creative Thinking	100	90 th percenti l e	-	Able to think creatively, generating new ideas and approaches to situations.
Merit-orientation	96	88 th percenti l e	-	Judges ideas and people on merit alone, without bias or favoritism.
Recognition of Opportunity	95	88 th percenti l e	-	Recognizes new opportunities and acts to take advantage of them.
Written Communication	98	87 th percenti l e	-	A good writer, expresses ideas and positions clearly.
Flexibility	98	87 th percenti l e	-	Adapts easily to changing situations and is able to adopt new approaches when necessary.
Decisiveness	94	87 th percenti l e	-	Able to make decisions even in ambiguous situations and without full information.
Critical Thinking	98	87 th percenti l e	-	Able to think critically (define a problem and determine the information needed to solve it; understand unspoken assumptions; form and test hypotheses; and judge the validity of conclusions).
Strategic Thinking	95	82 nd percenti l e	-	A strategic thinker: able to grasp the big picture and think long-term.
Quick Thinking	94	80 th percenti l e	-	Picks up new ideas and processes new information quickly and easily.
Quantitative Analysis	88	75 th percenti l e	-	Skillful using quantitative analysis to understand business issues.

COMPARISON SCORE: A 90 means that your self-confidence is higher than 90% of those business professionals. A 10 means that 90% of the business professionals are more confident than you are.

BRINGING MANAGEMENT STRUCTURE

Skilled at accomplishing concrete goals at work (either independently or by delegating to others). Pragmatic and practical. Able to juggle many tasks and reliably produce results.

Although all 41 skills from the Leadership Skills Profile are used to compute your score on each factor, these are the most important individual skills for this factor. This is a measure of *your* perception of *your* skill versus the perception that *other* people have of *their own* skill. While self-confidence is a powerful predictor of actual performance, we recommend that you also ask for feedback from other people who are able to assess your skills.

- YOUR SCORE: your assessment of your skill level
- COMPARISON SCORE: your assessment compared to several hundred thousand other business professionals' assessments of *their own* skill levels
- 360 SCORE: your raters' assessment of your skill level

SKILL	YOUR SCORE	COMPARISON SCORE	360 SCORE	DESCRIPTION
Persistence	100	87 th percenti l e	-	Doesn't get discouraged and give up on things easily.
Action-orientation	97	87 th percentile	-	Action-oriented: makes sure that decisions are implemented.
Delegating	91	86 th percentile	<u>-</u>	Delegates appropriately and effectively.
Time Management	91	85 th percentile	-	Manages own time well.
Multiple Focus	91	82 nd percentile	-	Able to juggle many projects and responsibilities at once.
Work Ethic	97	79 th percentile	-	Has a strong work ethic, willing to make sacrifices to achieve important goals.
Day-to-Day Responsibility	86	74 th percentile	-	Takes good care of the day-to-day aspect of running things.
Resilience	81	61 st percentile	-	Handles pressure and stress well.
Organizational Priority	78	55 th percentile	-	Able to make decisions that are in the best interest of the organization, even though they cause individual people distress.

My Key Skills

Don't let yourself make the very common mistake of pursuing a career that you're not really excited about simply because you're good at it. Like choosing a career that doesn't interest you just because it pays well, this is a recipe for you to lead an unsatisfying, and ultimately unsuccessful, career. Think first, "What am I really interested in?" and then, "What careers will let me express those interests, and for which I have the skills I'll need to succeed?" Keep in mind that to succeed, you need enough skill to do the work. But, once you've cleared that threshold, you're fine. Is more skill better? Maybe. But, if you and a colleague have the same skill level, and that person is far more interested in the work, chances are they will be more successful.

And, while self-confidence is a powerful predictor of actual performance, we recommend that you also ask for feedback from other people who are able to assess your skills.

These are skills in which you are significantly more confident than other business professionals.

ORAL COMMUNICATION	A skillful public speaker, good at presenting ideas and plans in a persuasive manner.
ASSERTIVENESS	Able to defend a point of view and to confront others appropriately when necessary.
COMFORT WITH RISK	Takes risks when appropriate, isn't afraid to innovate and experiment.
CREATIVE THINKING	Able to think creatively, generating new ideas and approaches to situations.

MY CAREER MATCH

Utilizing sophisticated and complex algorithms, you have been compared to satisfied, successful business professionals in 33 different careers. Your score represents how closely you align with the career on a 0 to 100 scale. The higher the score, the better the match.

- A score of 90 means that you are more similar to people in that career than 90% of several hundred thousand other business professionals.
- A score of 10 means that you are more similar than only 10% of other business professionals.

What defines a "good" match? Scores in the 90s? Where's the cut-off? Unfortunately, there's no definitive answer to that question.

- If you have seven scores of 92 and above, and your next score is 88, you should consider those seven as your good matches, and then ignore the 88 and any scores below it.
- But, if your highest score is 92, followed by an 88, then you should consider them both good matches.
- And, if your highest score is 82, then you should consider that a good match.
- Of course, this rule breaks down the lower the numbers go. For example, a score of 7 is not a good match, even if it is your highest.

As you look at your results, you probably need to think long-term, not "my very next job." If you're about to graduate with a business degree, you're very unlikely to be hired as an investment fund manager. So, if that's your goal, think of it as a career "beacon," and chart your course towards it. Remember, a career is a path, not a point.

REAL ESTATE DEVELOPMENT	94	VERY HIGH
REAL ESTATE FINANCE	90	VERY HIGH
SUPPLY CHAIN MANAGEMENT	86	VERY HIGH
NON-PROFIT MANAGEMENT (HIGHER EDUCATION, GOVERNMENT AND HUMAN SERVICES)	84	VERY HIGH

MY CULTUREMATCHTM

This analysis was developed for you based on the assessment of the four fundamental dimensions of personality, each of which has a parallel in organizational culture. Each scale is independent of the other three, and are neither positively nor negatively related.

COLLABORATION AND CONSIDERATION

MIDDLE

In an organizational culture high in Collaboration and Consideration, building and preserving a warm, friendly atmosphere is viewed as important to the success of the group, and is encouraged by top management. This is a group that values, and whose members are characterized by, paying attention to the individuals doing the work and the relationships between team members, as well as the work itself.

A low Collaboration and Consideration is not populated by people who are inconsiderate, don't care about people, or are unwilling to work collaboratively with others. But they do want to get on with the job, and may become impatient when progress is slowed by what they consider to be paying undue attention to whether everyone is "feeling good."

A low Collaboration and Consideration culture is likely to tolerate a high Collaboration and Consideration person much more easily than the inverse, because he/she poses no threat to the organizational culture. On the other hand, it is difficult to build a high Collaboration and Consideration culture, but easy for it to be disrupted. The low Collaboration and Consideration person may be seen as a real and immediate threat to the organizational culture, which in turn can threaten the individual's personal career success.

Sometimes people confuse Extraversion and Decisiveness with Collaboration and Consideration, thinking that a high Extraversion and Decisiveness culture is going to be low on the Collaboration and Consideration dimension -- and vice versa. This is not the case.

The person with high scores on both dimensions is likely to be most comfortable, or successful, in a culture that embraces assertiveness and a certain level of internal competition. They believe this will result in healthy conflict that produces the best solutions. They'll also be most comfortable where social interaction and networking are major features of the organizational culture, and where people aren't afraid to take the leadership role.

But, they will want that competition to be fair and meritocratic, and for the good of the team. They will want those work relationships to have some level of genuine personal caring. And, they'll want for the person taking the lead, and arguing strongly for his or her point of view, to do so in a way that his or her "opponents" don't take personally, because it wasn't personal -- and they were never opponents.

Fortunately, organizations with a combination of Extraversion and Decisiveness, and Collaboration and Consideration are not difficult to find

What to look for in an organization

- How "warm" does the place feel overall? As you walk down the hall, are people friendly and eager to greet you? Do they seem genuinely happy to see each other?
- Is this an "up or out" organization where you either advance or leave? If so, how soon does the "cut" come? How severe is it? Do one of every five make it to the next level, or one of fifty? Most importantly, what impact does this have on the relationships among the people trying to be one of those five or fifty?
- How much do people in this culture know about each other on a personal level?
- Do company policies allow for flexibility for taking care of sick children, or other such concerns?
- How much does this culture appear to embrace "social Darwinism" (people who succeed do so for good reason, and winnowing out the weaker players is a good thing)?
- Do people genuinely seem to care about each other (look not at how they treat you, but how they treat each other -- and especially at how they treat staff assistants and others below them in the hierarchy)?

EXTRAVERSION AND DECISIVENESS

MIDDLE

An organizational culture characterized by a high level of the Extraversion and Decisiveness factor is a competitive environment where people are outgoing and assertive, and enjoy assuming a leadership role. In such a culture, pushing an agenda (within limits) to get things done is seen as a good thing.

People view meetings, discussions, debates, and negotiations not as annoying distractions from the "real" work, but rather as the work -- and they enjoy it. Similarly, while some people view social and business networking as an unavoidable chore, they see it as a fundamental -- and fun -- part of their work.

The low Extraversion and Decisiveness culture is characterized by teamwork (not "stars") and open competition and aggressiveness being uncommon. The person for whom this is a mismatch may be seen as a bit of a "bull in a china shop" or, even worse, as someone who is only out for themselves -- who wants to be the star with a "supporting cast," rather than to help the team win.

Someone with a high score on Extraversion and Decisiveness needs to be especially careful in his or choice of organizational culture. The person who is low on Extraversion and Decisiveness may be ineffective in a high Extraversion and Decisiveness culture, but the cultural mismatch won't be jarring. On the other hand, the person *high* in Extraversion and Decisiveness operating in a *low* Extraversion and Decisiveness culture will be highly visible to everyone around. They might come to be seen as people who "suck up all the air in the room," and don't stop talking long enough for anyone else to voice an opinion.

The saying -- "The nail that sticks up gets hammered down" -- is a particularly apt description of a low Extraversion and Decisiveness culture. Be sure not to put yourself in a position to attract the hammer.

A low score on this scale *doesn't* mean that someone is indecisive, or an "introvert." (Remember: CultureMatch describes the kind of work environment someone will be most comfortable and successful in. It doesn't pretend to "diagnose" people's personality types.) And, it doesn't mean that people are not determined to get ahead in their careers. They may be highly competitive, but refrain from showing it in an overt manner.

Sometimes people confuse Extraversion and Decisiveness with Collaboration and Consideration, thinking that a high Extraversion and Decisiveness culture is going to be low on the Collaboration and Consideration dimension -- and vice versa. This is not the case.

The person with high scores on both dimensions is likely to be most comfortable, or successful, in a culture that embraces assertiveness and a certain level of internal competition. They believe this will result in healthy conflict that produces the best solutions. They'll also be most comfortable where social interaction and networking are major features of the organizational culture, and where people aren't afraid to take the leadership role.

But, they will want that competition to be fair and meritocratic, and for the good of the team. They will want those work relationships to have some level of genuine personal caring. And, they'll want for the person taking the lead, and arguing strongly for his or her point of view, to do so in a way that his or her "opponents" don't take personally, because it **wasn't** personal -- and they were never opponents.

Fortunately, organizations with a combination of Extraversion and Decisiveness, and Collaboration and Consideration are not difficult to find.

What to look for in an organization

- Does this organization have a reputation for being unusually aggressive in its dealings with other organizations, and for attracting individuals with an aggressive style?
- How much is success in this culture a function of the size of your "network?"
- What is the ratio of "work done with others" to "work done alone"?
- How much business entertaining does the work involve?
- Regardless of what it is called ("sales," "business development," etc.), how much of the work involves selling?
- If you have the opportunity to interact with several people from the organization at the same time (for example, over dinner), what is the flow of conversation like? Are people careful to wait until someone has finished speaking before talking themselves, or do they interrupt with comments and questions? Do they seem to feel free to disagree with one another -- in a respectful way)?
- How much time is spent analyzing and thinking, versus discussing and persuading?
- How often do you hear words like "star" and "super-achiever" versus "team" and "group effort?"
- How much is success dependent on professional training and domain expertise?

INNOVATION AND CHANGE

MIDDLE

If the Precision and Planning dimension of organizational culture is about "planning vs. action," Innovation and Change is about "creating vs. keeping the ship afloat and getting things *done*."

An organizational culture characterized by a high level of the Innovation and Change factor values taking a creative, "What if...?" approach to work. Embracing change and trying out new ideas are key elements of this culture factor. The "motto" of the culture you want is: "If it isn't broken, see if you can make it better anyway." Organizations and teams whose products or services are based on innovation, idea generation, and the creation of intellectual capital (e.g., consulting, new product development, marketing, advertising) are usually characterized by high Innovation and Change cultures.

The low Innovation and Change culture, by contrast, values taking a pragmatic approach to work, and carefully evaluating new ideas for change. Here the motto would be "If it ain't broke, don't fix it" is more likely to be found in organizations that hold dominant positions in markets that do not require a high degree of innovation. In these cultures, the goal is likely to be polishing and protecting the brand. You don't kill the goose that lays the golden eggs. At most, you try to get an extra egg or two.

Sometimes people confuse Precision and Planning with Innovation and Change, thinking that a high Precision and Planning culture is going to be low on the Innovation and Change factor -- and vice versa. This is not the case. Someone may have high scores on both the Precision and Planning, and Innovation and Change factors. This means that they may love adventure. But, before they set out on an expedition, they're going to make sure they have enough of everything they will likely need. Then, they'll be ready to enjoy the unexpected. They may be enormously innovative, creative, and comfortable with change. But, when it comes time to proceed to the next step, they're going to "check the math" and make sure the plans are complete before proceeding.

For some, this combination means that their innovations are likely born from their careful, precise, logical examination of the current situation. They see an inconsistency or anomaly, and go from there. Innovation can come from critical thinking, as well as from a purely original idea.

Fortunately, organizations with this combination of a Precision and Planning culture, and an Innovation and Change culture, are not difficult to find.

What to look for in an organization

- On balance, does this organization have more to lose by trying something new that fails than it has to gain by trying something that might succeed?
- Does the organization hire people from unusual backgrounds taking a chance that someone without the traditional training and experience will add value?
- Is there a lot of variety in the work you would be doing (and are there lots of new things happening)?
- Is the organization part of a young and rapidly changing industry (versus a mature, slow growth industry)?
- What is the decor of the office? How are people dressed?
- If applicable, how many patents do people in the organization hold?
- How large is the budget for research and development (or new product development)?
- How old is the company?
- How did they respond in interviews to your description of examples when you have done something innovative and creative?
- How much are new ideas and creativity valued and rewarded in this culture generally speaking? Are they critical to the success of the organization, or are they "nice to have" but not something that will make or break the company?
- Is the group you would join expected to keep something running well that is already successful?
- Does the nature of the business mean that the world throws new challenges at them on a frequent basis?
- Is the organization relatively "flat," or does it have a more up-and-down hierarchy?

PRECISION AND PLANNING

MIDDLE

A high Precision and Planning culture is one that values, and whose members are characterized by, taking a logical, careful approach to work. Planning for contingencies, checking and rechecking the calculations and facts, and being organized and careful are all aspects of this cultural dimension.

Typically, organizations that have a lot to lose, or where the consequences of errors are extremely costly (the new passenger jet crashes, the new drug causes birth defects, etc.), are going to have high Precision and Planning organizational cultures.

Being a high Precision and Planning person in a low Precision and Planning organization is likely to present a problem: the person may be experienced as a "drag" on progress. But, the organization isn't likely to see this gap as requiring immediate attention.

A high Precision and Planning organization on the other hand, is likely to see a low Precision and Planning person as a real risk to its success, which in turn can put the individual's personal career success at risk.

Sometimes people confuse Precision and Planning with Innovation and Change, thinking that a high Precision and Planning culture is going to be low on the Innovation and Change factor -- and vice versa. This is not the case. Someone may have high scores on both the Precision and Planning, and Innovation and Change factors. This means that they may love adventure. But, before they set out on an expedition, they're going to make sure they have enough of everything they will likely need. Then, they'll be ready to enjoy the unexpected. They may be enormously innovative, creative, and comfortable with change. But, when it comes time to proceed to the next step, they're going to "check the math" and make sure the plans are complete before proceeding.

For some, this combination means that their innovations are likely born from their careful, precise, logical examination of the current situation. They see an inconsistency or anomaly, and go from there. Innovation can come from critical thinking, as well as from a purely original idea.

Fortunately, organizations with this combination of a Precision and Planning culture, and an Innovation and Change culture, are not difficult to find.

What to look for in an organization

- How severe are the consequences of this organization's products or services not working perfectly? Do people risk serious injury, become seriously ill, or possibly death as a result? Does even a brief outage cost the company millions in revenues? Will thousands of consumer hard drives be erased as a result of a programming error?
- Is there detailed documentation of the procedures used in the manufacturing or service delivery process?
- Does the organization provide training for new hires, or are they expected to "sink or swim?"
- How much work is done under tight (and possibly unpredictable) deadline pressure?
- Do people have relatively specialized roles, or is the culture one of everyone pitching in to do everything?
- Are the duties and reporting relationships for the position clearly spelled out?
- Do decisions often have to be made, and actions taken, with little time to process all the relevant information?
- Does the organization have clear long-term goals?
- Does this organization engage in contingency planning by anticipating different scenarios and being ready for them?
- How neat and orderly is the work environment generally speaking?
- Does a lot of the work consist of "one-offs" so there isn't much opportunity for learning from the past and applying those lessons to the future?
- Do the interviews have a planned feel to them, like there is a clear logic underlying them?

THINGS TO BE ALERT FOR

...ON THE JOB AND IN A JOB SEARCH

CareerLeader's analysis of several personality dynamics did not point to any specific career risks that you ought to be especially aware of. This is good news. But, we do want to alert you to several pitfalls that present a danger to people in general, and that have derailed many careers:

- Walking into a mismatch with an organization's overall culture. A cultural mismatch can lead not just to unhappiness, but to outright failure.
- Choosing a career based on what you're good at, even if you're not very interested in it. Your interests, not your abilities, are your long-term competitive advantage -- and they're the "energy" that powers your career. If you're not really interested in the work, the people who are will ultimately pass you by. This also holds for choosing a career based on what gives you the rewards you want (frequently, compensation) rather than your interest in the work.
- Failing to develop and maintain a professional network within and outside the organization in which you work. An internal network is helpful for understanding the unspoken norms and politics of the organization. Your external network can be especially valuable if you decide to leave your current employer. It can also help you compare compensation and learn how people doing similar work in other companies deal with the challenges you both face.

SUMMARY

We hope the information in this report stimulates your thinking about your career, regardless of how far along in it you are. Pay special attention to how your career matches with your interests, as that is the single strongest determinant of career success and satisfaction. And, always be sure to consider how your work's culture fits your personality.

Whether you are happy in your current role or expressly on a job search, don't forget to take advantage of the resources that CareerLeader offers you on-line.

Best wishes for your future career success and satisfaction!
